WHO WE ARE

At Prodigy, we're more than a product design and development firm - we are the industry's leader in product collaboration. Together, we can engineer anything. Our commitment is to future-proof your operations, transforming your challenges into opportunities for growth and success. Trust us to be your catalyst for change and excellence.

YOUR PROBLEMS SOLVED

Prodigy is your strategic partner in overcoming the toughest challenges in product development and project management. Our solutions encompass:

Resource Optimization: We fine-tune your team's expertise and workload balance to maximize productivity.

Timely Delivery: Ensuring projects are completed punctually while aligning with your business objectives.

Enhanced ROI: Proactively managing & minimizing expenses to improve profitability while developing differentiated products that lead the market.

Supply Chain Efficiency: Streamlining product design to mitigate risks and enhance supply chain performance.

Technical Expertise: Overcoming technical constraints and translating market needs into actionable technical requirements.

INDUSTRIES SERVED

Medical Device	Logistics & Material Handling

Food & Beverage	Baby/Childcare
Manufacturing/Industrial Equipment	Automotive
Hospital Systems	Utilities & Infrastructure
Defense	

WHY PRODIGY

37 Years in Business

500+ Patents

97% Repeat Business

4K+ Projects Completed

PMP & PMI-RMP
Certified

We're really happy with the work done on our flex cable project - Prodigy helped us with a critical problem that our engineers had looked at before from several different angles.

Prodigy's team had a methodological and data-driven approach to the project. Simulations done by the Prodigy team showed a fault in our connection system and we were able to run informed testing and design changes to resolve the issue.
