Innovation with the patient at the heart

Prodigy's industry-leading best practices are driving patient outcomes across the medical field. We are experts in understanding your unique needs – whether it be end-to-end product development management and execution or more niche expertise to drive your existing projects to the next level.

Device Types

- Single use
- Handheld Surgical Instruments
- Surgical Robotics
- Patient Handling
- Medical Equipment
- Dental
- Wearable Devices
- Medical Test & Measurement

Clinical Applications

Power Assisted Circular Stapler

Accelerant Sinuplasty Balloon Inflator

Power Assisted Endocutter

Parallel Closure Concepts

Gastric Band Test Machine
